

Librarian's Contribution as a Resource Person in the Summer Internship Programme 2026: Bridging Science and Digital Skills

The Research Committee, under the coordinatorship of *Dr. Raghwendra Mishra*, Department of Physiology, successfully organized the Summer Internship Programme 2026 on “**Computer & Web Application in Science Education**” during May–June 2026.

The programme was initially designed from a multidisciplinary perspective for 44 B.Sc. Semester-IV students of Ananda Mohan College, keeping in view the requirements of the CCF curriculum. Owing to its relevance and popularity, the initiative was subsequently extended to 55 Physiology Major students from Vidyasagar College, Vidyasagar Metropolitan College, Surendranath College and Bangabasi Evening College through an **External Summer Internship Programme-2026**. The programme combined lectures, practical assignments and interactive sessions conducted by faculty members of the college, enabling students to develop essential digital and research-oriented competencies relevant to contemporary science education and interdisciplinary research.

Dr. Dhiman Mondal, Librarian, Ananda Mohan College, actively contributed to the internship programme as a Resource Person, conducting six sessions combining offline and online mode, on areas directly related to academic information literacy, digital awareness, artificial intelligence and cyber security. The major areas covered were:

- Web-based Information Sources for Academics
- Use of AI Tools for Academic Success
- Cyber Security and Social Media Threats

The sessions introduced students to effective approaches for:

- identifying and accessing web-based academic information sources;
- developing appropriate information-searching strategies;
- effectively using the Library's resources and OPAC;
- enhancing digital awareness and academic information skills;
- understanding and applying appropriate AI tools for academic purposes;
- recognising cyber-security risks in the digital environment; and
- understanding threats associated with social media and responsible digital practices.

The sessions were designed to provide students with practical exposure to the effective use of digital information resources and emerging technologies for academic purposes. Along with the theoretical discussions, assignments were provided to students to facilitate hands-on learning and practical application of the concepts discussed during the sessions.

The valedictory session and certificate distribution ceremony of the B.Sc. Summer Internship Programme was held on 10 July 2026 (Friday) at Ananda Mohan College with the distribution of certificates and mementoes. As a resource person, **Dr. Dhiman Mondal**, Librarian also received felicitation for their valuable contributions to the programme. The valedictory programme marked the successful completion of the internship and celebrated the students' enthusiastic participation and learning throughout the programme.
